WiggleWorks: Reading Style and Documentation Error (6/95)

===

Article Created: 5 June 1995

TOPIC ---

There is a feature in WiggleWorks for changing the pace of the Reading Style. In
the manual where changes to settings made through the parent menu are described,
it refers to this as the read-aloud pace. It should state it as the READ pace.
The setting only affects the Read pace for the READ Button.

DISCUSSION --

Within WiggleWorks when a book is selected, the user is presented with two read
buttons. One is labeled READ-ALOUD, where the program reads the text aloud and
highlights text as it does so. The other is labeled READ, where the children can
read the text on their own or have it read to them.

The READ-ALOUD option is pre-programmed with reading style and voice. Changes to
the Reading style do not affect the READ-ALOUD option. The changes to the
reading style ONLY affect the Read Button. A change to reading style can be made
by the user during the current run of the program. If a parent or teacher wants
the change to the reading style to be permanent they must go through the Parent
menu.
