This article describes the features of the Macintosh Duo MiniDock.

DISCUSSION -----

Overview

=====

The Macintosh Duo MiniDock provides expansion capabilities for the Macintosh PowerBook Duo computers.

When you are away from your office and want to work with desktop resources, you can use the portable Macintosh Duo MiniDock. It provides standard Macintosh connections to large displays, a modem, and other peripherals.

Apple's new PowerLatch docking technology ensures easy, automatic docking between the Macintosh PowerBook Duo and the Duo MiniDock, so there is no need to plug and unplug cables or to reconfigure the system each time you insert the PowerBook Duo into the Duo MiniDock.

Macintosh Duo MiniDock Features

=====

- Small size and weight for easy portability
- PowerLatch docking technology
- Built-in video support for 256 colors
- Supports most Apple displays, including the Macintosh 16" Color Display, as well as some VGA and SVGA displays

- 9 built-in ports, including SCSI port
