At Ease 3.0 WorkGroups: Gray Buttons In At Ease Setup (8/95)

=====

Article Created: 06 July 1995
Article Reviewed/Updated: 14 August 1995

TOPIC -----

I am in the At Ease Setup program in At Ease 3.0 for WorkGroups and I cannot select certain items. Sometimes the On and Off buttons are gray and other times, I am unable to select a Setup or a User from the lists because they are grayed out. Why is this happening?

DISCUSSION -----

You have logged into At Ease Setup as a Middle Level Administrator (MLA). The SuperUser can allow MLAs different privileges, and depending on those privileges different parts of At Ease Setup may not be available.

For example, no MLA can turn At Ease on or off, or access the network menu so these options are grayed out for every MLA. Another MLA may not be able to add or modify Setups, so when they log on the Setup list will be grayed out in addition to the On/Off buttons.
