AplShare Windws Client & IBM PS Valuepoint Ethernet Card (9/95)

===

Article Created: 29 September 1995

TOPIC ---

This article describes an issue between AppleShare Client for Windows and the
IBM PS Valuepoint Ethernet Card.

DISCUSSION ---

If the IBM PS Valuepoint ISA Ethernet card is being used with the AppleShare
Client for Windows, the Windows PC will hang when attempting to login to an AFP
file server. The solution is to update the F1ODISH.COM driver to one dated 30
April 1994 or later.
