Apple Macintosh 7500/8500 CD-ROM: Telecom Installer (1/96)

=====

Article Created: 15 December 1995
Article Reviewed/Updated: 26 January 1996

TOPIC -----

When I try to install the Apple Telecom Software from the Apple Macintosh 7500/8500 CD-ROM disc v1.0.1, I get the following message, "The alias 'Apple Telecom Install' could not be opened, because the original item could not be found."

How do I install the software?

DISCUSSION -----

This error occurs because the alias to the Apple Telecom Installer, on the Apple Macintosh 7500/8500 CD-ROM disc v 1.0.1, is not linked to the correct file. To install the Apple Telecom software from this version of the CD follow this procedure:

From the Apple Macintosh 7500/8500 CD-ROM disc v 1.0.1:

Step 1
Open the Apple Extras folder.

Step 2
Open the Apple Telecom folder.

Step 3
Open a second Apple Telecom folder.

Step 4
Open the Apple Telecom Disk 1 folder.

Step 5
Double-Click the Installer icon. (You may have to scroll down the window, to locate the software.)

Step 6

Follow the installation directions presented on screen.

The Installer will guide you through the installation, and prompt you to restart the computer once the installation is completed.
