Apple MessagePad 120: Determining RAM Size (2/96)

Article Created: 30 January 1996
Article Reviewed/Updated: 6 February 1996

TOPIC -----

Is there a way to determine how much RAM is in my Apple MessagePad 120?

DISCUSSION -----

There is no way to determine the RAM configuration without powering on the Apple MessagePad 120.

You can check the RAM configuration by tapping the information icon in the Extras drawer. The total of Used, Free, and System RAM installed will equal 1MB or 2MB.

Step 1

Turn on your Apple MessagePad 120

Step 2

Tap Extras

Step 3

Tap the information icon ('i' in the lower left corner)

Step 4

Tap Memory Info

Step 5

Add the System RAM Installed, Used and Free numbers. This is the total flash RAM installed.

Example:

System RAM: 512k
Used: 952k
Free: 409k
Total: 1873k (2MB)

Article Change History:

06 Feb 1996 - Corrected Type of RAM.
