==

Article Created: 27 February 1996

TOPIC ---

v2.092. When I launch the application, sometimes my Macintosh freezes, other
times an error message appears that reads "unauthorized duplicate running".

DISCUSSION --

Roger Wagner Publishing, who makes and supports HyperStudio, is aware of this
issue and is providing an update to 2.097 which allows HyperStudio to run on
computers connected to a network. Contact Roger Wagner for the software update.
