Using MIDI software on Power Macintosh computers (3/96)

=====

Article Created: 4 March 1996

TOPIC -----

I am having problems using some MIDI software made by Opcode on my Power Macintosh 7200 computer. Previously, I used this same MIDI software on another Macintosh computer without any problems.

DISCUSSION -----

Opcode's MIDI music software works properly when you update to OMS v2.0.2. You can update your version of OMS by downloading the latest OMS software from Opcode's online FTP or WWW site.
