System 7.5 Update 2.0: AppleVision Software Version (3/96)

===

Article Created: 29 March 1996

TOPIC ---

I have an AppleVision display, I am confused over which version of the
AppleVision software I should be using since I installed the System 7.5 Update
2.0 software.

DISCUSSION --

If you use AppleVision software, use version 1.0.2 or later. Earlier versions of
AppleVision are not compatible with System 7.5 Update 2.0.

If you have a 1710AV monitor and a PCI-based computer, use AppleVision 1.0.4 and
the Monitors & Sound control panel.

If you have a 1710AV monitor and a non-PCI-based computer, use AppleVision
1.0.2, the Sound control panel, and the Monitors control panel.

These articles can help you locate the software update mentioned here:

• "Where To Find Apple Software Updates" - Lists online services for free Apple
software updates.

• "Obtaining Apple Product Support in the USA" - Lists 800 numbers and online
services for software updates, Apple support information, and a subset of the
Apple Tech Info Library.
