MAE 2.0: "Failed to get ROM memory" Error on Solaris (5/96)

=====

Article Created: 11 May 1996

TOPIC -----

After installing MAE 2.0 on an UltraSparc with Solaris 2.5, and restarting, I attempt to start MAE. The splash screen will appear for a moment, then disappear. The error "Failed to get ROM memory" will appear in the shell that MAE was started from.

DISCUSSION -----

MAE 2 requires Patch 2 to run under Solaris 2.5 and the UltraSparc. Upgrade MAE with this patch, and restart your workstation. Upon this restart, MAE will launch successfully.

The Patch can be found on <ftp.support.apple.com>, or [www.mae.apple.com](http://www.mae.apple.com).
