System 7.5 Update 2.0 and CalComp (5/96)

==

Article Created: 23 May 1996

TOPIC ---

I installed System 7.5 Update 2.0, and now I have a conflict with CalComp's
Drawing slate control panel version 1.9a. It crashes on startup or if the
control panel is double-clicked.

DISCUSSION --

CalComp Technical Support states version 1.9a of their software will work with
System 7.5.3 if the CalComp software is reinstalled after upgrading to 7.5.3.

However, CalComp Technical Support recommends upgrading to version 2.0. It is
available on their ftp site,

ftp.calcomp.com

or on their BBS, 714-236-3045.

On both locations, the file name is "adb20a.sea".
