ARA 2.0 compatible with Power Macintosh (7/96)

=====

Article Created: 10 July 1996

TOPIC -----

Is Apple Remote Access (ARA) Personal Server 2.0 compatible with PowerPC or must a user upgrade to 2.0.1?

DISCUSSION -----

Both the Personal Server and Client versions of ARA 2.0 are PowerPC compatible. Although we recommend updating to the latest version, to take advantage of new features, it was not necessary to do so for PowerPC compatibility.
