Sound Manager 3.2.1: Minor Fixes for QuickTime 2.5 (9/96)

===

Article Created: 9 September 1996

TOPIC ---

When I installed QuickTime 2.5, Sound Manager 3.2.1 was also installed. Sound
Manager was integrated into the Mac OS, so why is there a new version of Sound
Manager?

DISCUSSION --

During the development of QuickTime 2.5, the QuickTime engineering team
uncovered a few minor problems in Sound Manager 3.2 (which is integrated into
System 7.5.3) that could affect QuickTime. So, a new version of Sound Manager,
Sound Manager 3.2.1 was created and shipped with QuickTime 2.5.

If you are using QuickTime 2.5, you should have Sound Manager 3.2.1 installed.
If you are running versions of QuickTime prior to 2.5, it shouldn't make a
difference which version of Sound Manager is used since the problems only appear
when QuickTime 2.5 are used.
