AppleShare 4.2.1 to 4.2.2 Updater (9/96)

=====

Article Created: 30 September 1996

TOPIC -----

This article is the AppleShare 4.2.1 to 4.2.2 Updater read me information.

DISCUSSION -----

This patcher application will update AppleShare from 4.2.1 to 4.2.2. Some third party applications and control panels have been found to change the modification dates of certain files to the current date even though no changes have been made to the file.

AppleShare 4.2.1 to 4.2.2 Note

With AppleShare 4.2.1, the modification date of a file can change, even if a file has read-only access. If this occurs, no modifications are made to the actual data in the file. The change is being made by the server, not the client workstation or the application. AppleShare 4.2.2 resolves this issue with third party software incorrectly changing the modification dates of certain files. This patcher application will update AppleShare 4.2.1 to 4.2.2 and prevent this problem from occurring. Apple recommends that AppleShare 4.2.1 customers install this patch.
