Apple QuickTake Cameras: External Power Q&A (10/96)

=====

Article Created: 1 October 1996

TOPIC -----

This article about the QuickTake 100 and QuickTake 150 digital cameras contains questions and answers regarding the external power requirements.

DISCUSSION -----

Question: What are the external power requirements of the Quicktake cameras?

Answer: The manuals for the QuickTake 100 and Quicktake 150 state that the external power requirements for the camera are:
4.5 V DC/1.75 A to 8.0 V DC/1.0 A.

Question: What is the voltage output of the Battery booster pack?

Answer: 6 volts (nominal).

Question: What is the polarity of the cable used to connect the battery pack to the camera?

Answer: The center terminal of the connector is positive and the shell is negative.
