Where Are OT/PPP Control Panel Settings Stored? (4/97)

=====

Article Created: 1 April 1997  
Article Reviewed/Updated: 2 April 1997

TOPIC -----

Where are the Open Transport/PPP control panel settings stored?

DISCUSSION -----

The configuration information entered through the PPP control panel are stored in the Remote Access Connections document (System Folder:Preferences:Remote Access:Remote Access Connections). Removal of this file clears all PPP control panel preferences including saved configurations and connect scripts.

Modem scripts used by OT/PPP are stored in the same location as ARA modem scripts, (System Folder:Extensions:Modem Scripts).

Modem control panel settings are stored in the Modem Preferences file (System Folder: Preferences: Modem Preferences).
