## TITLE

Apple Studio Display 21: Do Not Daisy Chain Multiple Displays Together	Article ID: 58214 Created: 1/4/99 Modified: 1/13/00
--	---

## TOPIC

I noticed there are four USB ports on the Apple Studio Display 21". Can I use one of those ports to daisy chain the USB cable when using more than one Apple Studio Display on my Power Macintosh G3 (Blue and White)?

## DISCUSSION

If you daisy chain multiple Apple Studio Display 21" displays together, the Power Macintosh G3 (Blue and White) may restart itself approximately 3-5 seconds after you shut down. If this occurs, reconnect the additional displays directly to your Power Macintosh G3 (Blue and White).

Alternatively you can use a USB hub. Although the Apple Studio Display 21" is a USB hub, the four ports on the side should be used for connecting other USB devices.

**Note:** The Viewable Image Size of the Apple Studio Display 21" is 19.8 inches.
