## TITLE

Apple Studio Display 21/Apple Studio Display 17: Tripod  
Stand Safety Tips

Article ID: 58217  
Created: 1/4/99  
Modified: 1/13/00

## TOPIC

This article provides specific safety tips relating to the new tripod stand used on the Apple Studio Display 21" and Apple Studio Display 17" displays.

## DISCUSSION

- Lift the display by the indentations on the under-sides near the front of the display. Never lift the display by the tripod stand.
- Likewise, do not adjust the position of the monitor by pulling the stand legs. The tripod stand is subject to damage if mishandled.
- When placing the monitor on a table surface, ensure that all three legs on the tripod stand contact a solid surface. If one of the legs is too close to the table edge, the weight of the monitor could cause the display to fall off the edge.

**Note:** The Viewable Image Size of the Apple Studio Display 21" is 19.8 inches, the Apple Studio Display 17" has a Viewable Image Size of 16.0 inches.
