Apple Floppy Drives: How Many Heads? (5/95)

=====

Article Created: 26 May 1995

TOPIC -----

I just bought a disk head cleaning kit. It asks if I have a single or dual head drive. How many heads do Apple floppy drives have?

DISCUSSION -----

All Apple floppy drives since the Apple SuperDrive (FDHD) have two heads -- one on the top and one on the bottom. Floppy drives before the Apple SuperDrive usually had one head.
