Restoration CD: Market Software Series ReadMe, Jan '95 (4/96)

=====
Article Created: 12 September 1994
Article Reviewed/Updated: 02 April 1996

TOPIC -----

This file contains a listing of all the software configurations available on the CD. In addition, this file contains important information about the release of the Apple Restoration CD that supersedes information in the Apple Restoration CD User's Guide.. Refer to the on-line descriptions and those provided here when selecting a software configuration to restore on Macintosh computers.

DISCUSSION -----

Apple Restoration CD - Read Me File
Market Software Series, January 1996

Restoration CD Configuration Information

For your convenience, the contents for all of the Market Software Series volumes are listed here:

Volume 10, January 1996

=====

Description -----	Part Number -----
Education Software Summer 1995 for LC580 -----	
7.5.1 for AELC - Student	694-0458
7.5.1 for AELC - Teacher	694-0452
7.5.1 for Early Childhood Connections	694-0450
7.5.1 for Spanish Language Connection-Student	694-0554

7.5.1 for Spanish Language Connection-Teacher 694-0543

Volume 9, January 1996

=====

Description	Part Number
-----	-----
Fall 1995 Performa Software	

7.5.1 for 5200CD	694-0652
7.5.1 for 6230CD	694-0651
7.5.1 for 580CD	694-0569

Volume 8, January 1996

=====

Description	Part Number
-----	-----
Fall 1995 Performa Software	

7.5.1 for 5215CD	694-0648
7.5.1 for 6200,6218	694-0667
7.5.1 for 6220CD	694-0645

Volume 7, January 1996

=====

Description	Part Number
-----	-----
Fall 1995 Performa Software	

7.5.1 for 6205CD	694-0586
7.5.1 for 6214CD	694-0566
7.5.1 for 6216CD	694-0540

Volume 6, May 1995

=====

Description	Part Number
-----	-----
April 1995 Performa Software	

```

-----
7.5 for 5200LC/75                694-0408
7.5.1 for 640CD DOS Compatible    694-0429

```

Volume 5, January 1995
=====

Description -----	Part Number -----
September 1994 Performa Software -----	
7.5 for 6112	694-0331
October 1994 Education Software -----	
7.5 for AELC - Student	694-0393
7.5 for AELC - Teacher	694-0392
7.5 for Early Childhood Connections	694-0394
7.5 for Spanish Language Connection - Student	694-0396
7.5 for Spanish Language Connection - Teacher	694-0395

Volume 4, September 1994
=====

Description -----	Part Number -----
September 1994 Performa Software -----	
7.5 for 637-Money Magazine Edition	694-0336
7.5 for 630CD,635CD,638CD	694-0334
7.5 for 630	694-0348
7.5 for 636	694-0349
7.1P6 for 460-Refurbished system	694-0333
April 1994 Performa Software -----	
7.5 for 575,577,578	694-0329
October 1993 Performa Software -----

7.0.1P-200,400-GreatWorks, MYOB	694-0004K

* Apple recommends that you install the System Update 3.0 from the CD after you install this configuration. Apple recommends that you install CD-ROM software if the computer being restored has a CD-ROM player attached.

Important Information

=====

1. You can use the Apple Restoration CD on the Apple CD SC Plus and newer Apple CD-ROM drives. If you are not booting from the Apple Restoration CD, you also need the appropriate CD-ROM software driver installed on your Macintosh computer.

2. You cannot boot from the Apple Restoration CD on Macintosh SE, SE/30, Classic, II, IIx, or IICx computers. With these computers, start your Macintosh with a bootable hard drive and then run the Restoration CD installer program from the Other Items window that appears in the Finder.

3. If you're restoring software to a blank replacement hard drive in a single-drive system, the computer should boot from the Apple Restoration CD after a few seconds. If the computer has an internal hard drive capable of booting the computer, press and hold down the Shift, Option, Command, and Delete keys while starting the system. If the computer has multiple SCSI hard drives that are set up as bootable startup disks, disconnect or leave them powered off while using the Apple Restoration CD. Here are a few other notes about booting from the Apple Restoration CD:

a. On Macintosh SE, SE/30, II, IIx, IICx, IICi, IIfx, IIsi, and Performa 20400, 405, and 430 computers, pressing and holding down the Shift, Option, Command, and Delete keys during startup disables the hard drive installed as SCSI device 0.

b. On all other computers except those listed in items 2 and 3a, pressing and holding down the Shift, Option, Command, and Delete keys during startup disables the hard drive chosen with the Startup Disk control panel. If no disk was chosen with the Startup Disk control panel, the computer will either disable the hard drive installed as SCSI device 0 or the key sequence will have no effect (depending on the model of computer).

c. In general, if you are using an Apple CD 300 player and you set the CD-R drive's SCSI device number to a higher number than a bootable hard drive, the computer should boot from the CD-ROM drive. If other devices are starting the computer, either disconnect them, set the CD-ROM drive to be the startup disk, or specify a hard drive to be the startup disk and then use the Shift-Option-Command-Delete key sequence to disable the drive. If the computer still attempts to boot from SCSI device 0, even after using the Shift-Option-Command-Delete key sequence, you can reset the startup disk to SCSI device 0 by clearing parameter RAM (pressing and holding down Option-Command-P-R keys while starting up your system). Note, however, that clearing parameter RAM also clears other user settings.

Article Change History:

02 Apr 1996 - Replace entire contents with updated information.

07 Sep 1995 - Made Minor Corrections.

08 Aug 1995 - Added Restoration CD Volume 6.
